

ELSEE GARDEN CLASSES

Saturdays
8-10AM

76 Race Street
San Jose, CA
95126

K-8th Grade

October 19, 2019 – May 29, 2020

The Middlebrook Center for Urban Sustainability is hosting weekly Saturday classes during the school year for students at our Environmental Laboratory for Sustainability & Ecological Education (ELSEE) outdoor teaching classroom. Classes cover California Science Education Standards for grades K-8th grade.

These classes will provide students with **hands-on learning** to live with earth's natural cycles and to **create positive change** towards a stable, habitable planet that they can thrive on. Learning outdoors will **improve students' physical and mental health** and teach students how their daily actions contribute to a larger ecosystem and society that **we have the power to change for the better**.

Sign up for 3 months or more! Classes are \$150 per month.

Learn about

- Earth's natural cycles
- Soil and soil microbes
- Local native California plants and wildlife
- Growing food
- Aquaponics
- Sustainable living

+ Earn Earth Hero Badges!
